

AKRIPOL Plastoprime

Akripol Plastoprime is a grey shaded, quick drying, one component plastic primer which is designed to be used on plastic bumper repairs.

It comprises both perfect adhesion on plastic car parts and medium build properties together.

Plastoprime has advanced coverage and reasonably short flash-off times. It accelerates repair processes.

It is produced as ready to use, no need for mixing. No waste. It is easy to use and has outstanding flow and levelling properties.

Features

Benefits

- Adhesion to plastic car parts
