

AKRİPOL Akritex

Akripol Akritex is a textured 1 component bumper paint designed to be used in vehicle refinish purposes.

It can be applied on both bare bumper plastics, existing finishes or Akripol Fillers.

It has good hiding power and quick flash-off properties. Akritex accelerates your repair processes.

Akripol Akritex can be tinted accordingly with the bumper color.

Since it is designed as a topcoat, It has good durability and weathering properties. No additional clearcoat application is needed.

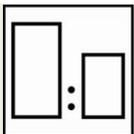

Features	Benefits
<ul style="list-style-type: none"> Plastic adhesion and topcoat durability performance together 	<ul style="list-style-type: none"> 1 product for multi purposes Reduced paint stocks Bodyshop efficiency
<ul style="list-style-type: none"> Can be tintable 	<ul style="list-style-type: none"> Reduced paint stocks User friendly
<ul style="list-style-type: none"> Fast drying 	<ul style="list-style-type: none"> Reduced cycle times Increased productivity & profitability
<ul style="list-style-type: none"> High durability 	<ul style="list-style-type: none"> No additional clearcoat application Reduced cycle times Customer satisfaction
